### ***Artist: Other Paintings & Drawings***

While solo exhibitions are usually designed around specific themes, and often made originally for a specific location, once a body of work is no longer possible for a solo exhibition (for example, due to sales) new themes take over and leave a residue of work which is still available. These works, along with those which never did belong to a large body of similar items, are to be found here. Included are the remaining pictures of the series *Fisherfolk 1987-1990* in drawings and prints and *Barcelona Tango 1993-1995*, a series of oil crayon/pencil drawings on paper. Often, of course, previous themes, even from many years ago, return and are 'updated', augmented. This has been particularly true of Italian and Welsh Landscapes where some series have continued to run since the 1970s.
